

BIN BANKING

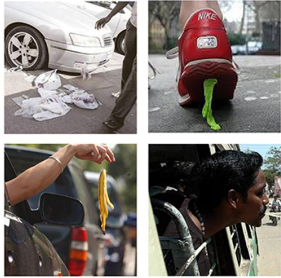

we would like to propose a system that will strive on human psychology for all the right reasons....

“envisioning a **smart city**, with **clever technologies** and even **smarter population**”

NEED OF THE IDEA

“ya we know how and what should be smart cities... let's fix what they should not be...!!”

LITTERING

AIR POLLUTION

Lets think smart

Aiming at superior sanitization and recycling processes

Building and promoting a sophisticated, efficient system of public transport

Lets make our population both consciously and sub-consciously imbibe the idea of “properly disposing-off garbage” and “use the public transport”. We should appreciate him for doing that.

Let's appreciate him, lets reward him...!!

THE IDEA AND IMPACT
